

GMR 3RD EDITION KINGDOM PREVIEW

PROTOPLASMIC

This kingdom represents monsters that are nothing more than formless masses of protoplasmic flesh.

The origin of the protoplasmic monster is unknown but, the accepted theory is that they are nothing more than simple single celled organism that have become infected with the Mutator X virus.

Monsters from this kingdom are often referred to as blobs, oozes, or slimes.

Special Rule, Extend: Protoplasmic monsters are able to stretch and distort their bodies at whim allowing them to extend the reach of their natural attacks.

Whenever a protoplasmic monster uses a natural attack it may extend the reach of the attack by 2" for every atomic power point it spends. There is no limit to the number of atomic power points that can be spent on this ability.

This ability can be used any time before a to hit roll is made.
